

**Dr Kesten C. Green**  
**Curriculum Vitae**

University of South Australia Business School  
GPO Box 2471, Adelaide SA 5001, Australia.

+61 8 8302 9097 (Tel)  
kesten.green@unisa.edu.au

**Research interests**

Evidence-based forecasting methods for business and public policy; predicting decisions in conflict situations (union-management, supply chain, competition, mergers/acquisitions, diplomacy, warfare); judgmental forecasting methods; survey research methods; use of analogies in forecasting; evidence-based advertising; economic growth of nations.

**Major findings**

**Unifying theory of forecasting:**

The *Golden Rule of Forecasting* provides a unifying theory of forecasting. The Rule is to be conservative when forecasting by relying on cumulative knowledge about the situation and about forecasting. Following the Golden Rule guidelines reduces forecast errors by nearly a third, on average, compared to common practice.

**Superiority of simple forecasting methods:**

Sophisticatedly simple forecasting methods, which can be understood by decision makers, reduce forecast errors by nearly a quarter, on average, compared to forecasts from complex statistical methods.

**New forecasting methods:**

Accurate forecasts of decisions by parties in conflict situations are possible. The *simulated interaction* method, which involves a type of role playing, and the *structured analogies* method provide forecasts that are substantially more accurate than forecasts from experts using their unaided judgment, and than forecasts from game theorists. Forecasts by experts using their unaided judgment are no more accurate than chance for these problems.

**Evidence-based public policy:**

- (1) The simple no-change model provides long term forecasts climate that are much more accurate than projections from the complex methods employed by the U.N.'s Intergovernmental Panel on Climate Change.
- (2) Mandatory disclaimers reduce welfare by interfering with the free flow of information from sellers to buyers.
- (3) Corporate social responsibility policies can be profitable and increase the welfare of a firm's stakeholders, but government mandated policies on corporate social responsibility tend to reduce welfare.

**Research Profile**

**H-index:** 16, i.e. 16 papers cited *at least* 16 times; 1171 citations in total. **i10-index** is 19 ([Google Scholar](#)).

**Top 4 cited:** 1. Green, Armstrong, & Graefe (2007) 197 times; 2. Green (2002) 125 times; 3. Green & Armstrong (2007, *IJF*) 95 times; 4. Armstrong & Green (2007, *IJB*) 95 times.

**SSRN:** **Top 1%** author by importance of citations (Author-Level Eigenfactor® Score).

**A and A\*:** 15 articles in journals ranked "A" or "A\*" in Australian Business Deans Council List.

**Cases** (Available for teaching or research from [conflictforecasting.com](http://conflictforecasting.com))

*Nurses Dispute* was a conflict over pay between the nursing staff and management of Capital Coast Health, a government-owned organisation operating hospitals. The decision was the size of the pay rise.

*Personal Grievance* was a conflict over the pay scale for employee's role. Decisions to be made were whether to commission a new independent evaluation, and whether to accept the salary band.

*Telco Takeover* was a conflict for the ownership of a regional telecommunications provider that occurred during 2001. The decision was how the stand-off between the two companies involved would be resolved.

*Water Dispute* was a 1975 conflict between Iraq and Syria over access to the water of the Euphrates. The decision was whether Iraq would move towards war or whether Syria would release more water voluntarily.

*Zenith Investment* was a 1975 conflict between British Steel managers over whether to invest in expensive new technology and, if so, whether to invest in one new plant, or two.

Centre for Asian Business research grant awarded in 2010 for “The effect of alternative policies on the ethicality of business decisions in China”.

SAS Grant awarded by the IIF in 2004 for research on usefulness of forecasts expressed as probabilities.

Best Paper Award 2002-2003 from IIF and Elsevier for Green (2002).

### Education

**2000 to 2003:** PhD candidate at Victoria Management School, Victoria University of Wellington. Thesis on forecasting decisions in conflicts accepted in September 2003; degree conferred 10 December.

**1998 to 2000:** Part-time Master of Management Science (Decision Sciences) student at Victoria University; switched from Masters program to full-time PhD program after starting thesis.

### Work History

**Nov 30 2009–:** Senior Lecturer, School of Commerce, previously International Graduate School of Business, and Senior Research Associate of the Ehrenberg-Bass Institute for Marketing Science, *University of South Australia*.

Member of School Executive Committee. Served on Division Consultative Committee.

Course Coordinator for Managerial Economics and Issues in International Trade.

Teaching Managerial Economics on campus and online, supervision of PhD, Masters, and Honours students. Median for on-campus teaching is 64, where 40 is the standard for full professor.

**2005–2009:** Senior Research Fellow, Business and Economic Forecasting Unit, *Monash University*.

**Jul–Dec 2004:** Visiting Senior Lecturer, Department of Econometrics and Business Statistics, *Monash University*. Lecturing to MBA students, senior graduate students and faculty, writing, and conducting research.

**2000 to 2001:** Senior Research Fellow, Victoria Management School, *Victoria University of Wellington* with responsibility for managing the Public Good Science Fund funded Employment Institutions Project.

**1995-2009:** Founder and Managing Director of *Decision Research Ltd*, which provided forecasts, programme evaluations, mail surveys, and depth interviews, as well as advice on forecasting, research, and management decision making. *Decision Research* was responsible for more than 60 diverse projects for clients in government and the private sector.

**1994 to 1995:** Founder and manager of *Pisé Blocks Limited*, a manufacturer of pressed earth blocks for construction. The blocks were an aesthetic triumph and the company was a marketing success but production technology was inadequate.

**1985 to 1994:** Founder and Director of *Infometrics Limited*, a leading New Zealand economic forecasting and consulting house. During my time, the client base grew to more than 70 subscribers while subscription fees quadrupled. I gave client seminars and consulted on economic issues.

**1982 to 1985:** Founder and Director of the publisher of *Bettor Informed*, a computerised horse-racing information magazine based on assessment of probabilities under different conditions. I developed systems, and organised production of this twice-weekly nationally distributed magazine.
